EDUCATION

Khulna University of Engineering & Technology — **Khulna, Bangladesh**
Computer Science and Engineering — *4th Year*
Notre Dame College — **Dhaka, Bangladesh**
Higher Secondary School Certificate — *Batch 2021*

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Python(familiar), Java(familiar)

Web Technologies: Frontend – HTML, CSS, Tailwind CSS, React.js, Next.js **Backend –** Node.js, Express.js, RESTful APIs

Database: Oracle, MySQL, Mongodb

Tools & Platforms: Git, GitHub, Postman, Docker, Netlify, Vercel

Core Concepts: Data Structures, Algorithms, OOP, Problem Solving

PROBLEM SOLVING

- Achieved **Pupil** title on **Codeforces** | Highest Rating 1203 – Profile Link
- Solved 650+ problems across Codeforces, CodeChef, LeetCode, and others.

PROJECTS

IdeaVault - Full-Stack Startup Idea Validation Platform — Github Live Demo
Tech Stack: Next.js, React, Tailwind CSS, DaisyUI, HeroUI, Better Auth, MongoDB, Recharts, Swiper

- Architected and developed a full-stack startup idea validation platform enabling users to discover, share, evaluate, and refine business ideas through community engagement.
- Developed data visualization dashboards and community statistics using Recharts to improve user engagement and platform insights.

Skill Sphere - A course marketplace website — Github Live Demo
Tech Stack: Next.js, React, MongoDB, Better Auth, Tailwind CSS, DaisyUI

- Developed a responsive, full-stack course marketplace using Next.js App Router and React, enabling dynamic routing and optimized data fetching strategies.
- Implemented secure user authentication by integrating Better Auth with a MongoDB backend, utilizing custom middleware for strict route protection.

Focus Keeper - A Chrome extension — Github
Tech Stack: Node.js, JavaScript (Chrome Extension API), Ollama (bge-m3), Nginx, PM2, REST APIs

- Engineered a production-grade Chrome extension for YouTube with a content filtering system to transform YouTube into a distraction-free learning platform.
- Integrated a multilingual sentence embedder via Ollama to generate high-dimensional text vector representations, applying the Cosine Similarity algorithm to dynamically hide non-relevant video suggestions and comments.
- Developed productivity features including an inline Markdown note-taking panel and custom UI toggles, leveraging persistent Chrome Storage to seamlessly maintain user state and configuration across sessions.

LEADERSHIP

Creative Director - IEEE Student Branch KUET — *Sep 2025 – Aug 2026*

- Directed creative strategies, branding, and visual content for flagship technical workshops, seminars, and events.
- Managed design operations and collaborated with cross-functional teams to elevate organizational presence.

Assistant Operations Secretary - KUET Business and Entrepreneurship Club — *Feb 2024 – May 2026*

- Managed event logistics, communications, and operations across a 2+ year tenure.
- Coordinated teams in event management and execution, leveraging Canva for strategic media and promotional materials.

Batch Representative - CSE Association, KUET — *Dec 2024 – Apr 2026*

- Served as the primary bridge between the department faculty and batchmates, managing academic and administrative coordination.

- Organized batch-level academic sessions, extracurricular activities, and departmental initiatives.

Senior Executive - Team Durbar *Jul 2024 – Aug 2026*

- Contributed to club growth, operational management, and execution of organizational events over a 2-year duration.

Graduate - Aspire Leaders Program 2024 *Aug 2024*

Host Organization: Aspire Institute (Founded at Harvard Business School Online)

- Completed a global leadership and professional development program focusing on soft skills, social impact, and leadership.

Volunteer - Hult Prize at KUET *Jan 2024 – Dec 2024*

Focus Area: Economic Empowerment

- Assisted in planning, operations, and execution for the local chapter of the world's largest student social entrepreneurship competition.

PARTICIPATIONS & ACHIEVEMENTS

Open-source Contributor | ***Hacktoberfest 2024 & 2025*** ***Badges***

Successfully submitted validated Pull Requests to open-source projects, demonstrating proficiency in Git workflows, collaborative development, and code review.

Team Lead & Developer | ***NASA Space Apps Challenge 2025*** *Team Paramanu*

Awarded "Galactic Problem Solver" distinction by global judges for developing innovative software to tackle real-world global and aerospace challenges.

6th Kibo Robot Programming Challenge | ***JAXA & NASA*** *Team Nam Lagbe Na*

Engineered autonomous navigation and image recognition programs for NASA's ISS Astrobee drone, placing 8th nationally for script efficiency, obstacle avoidance, and target precision.

2nd Runner-Up | ***BizBash 3.0 Business Case Study Competition*** | ***KUET Career Club*** *Team "The Catalysts"*

Solved complex real-world business challenges and presented strategic solutions through rigorous collaborative teamwork.
